

Environmental Management Policy

RFA-Tech Ltd was founded in 1978, and since that time it has been a leading force in the supply of steel reinforcement accessory products. Today the company operates on a national basis providing the construction market with traditional steel reinforcement accessory products.

The management of RFA-Tech Ltd are committed to the ultimate goal of operating a safe, efficient and environmentally aware organisation that generates sufficient resources for sustained growth.

All sites shall: -

- Implement and maintain an environmental management system that meets the requirements of BS EN ISO 14001.
- Develop and implement systems that ensure compliance with all regulatory requirements, specific customer requirements and recognised standards, including industry specific environmental schemes.
- Integrate environmental considerations into all company processes from purchasing through to supply.
- Seek to reduce all undesirable impacts on the environment through the reduction in the use of material and energy resources and the reduced generation of waste products.
- Be committed to the prevention of all forms of pollution.
- Promote a positive and responsible attitude on environmental matters to employees, suppliers and customers.
- Seek to continually improve the business systems in order to reduce all environmental effects.

All employees are required to comply with the requirements of this policy and the supporting procedures, and are also encouraged to raise environmental issues with the management. The policy is reviewed on a regular basis to ensure that it is still suitable and sufficient for the activities of the company.

This policy is communicated to all employees and is made available to other interested parties either directly or via the company website.
